-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Information Disclosure Statement***

1. The information disclosure statement filed 8/11/2004 is acknowledged by the examiner.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear to the examiner what passageways are being referred to as the "further passageways" in claim 13.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-7, 11, and 13 as far as it is definite, are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Pat. No. 6,868,865 (Tran). Tran discloses a ball valve for fluids comprising a body (16), an inlet (20), an outlet (22), an inner chamber (adjacent path 18 in figure 1 around valve 12), a ball element (12) having a main pathway (24), the ball element (12) having a open position and a closed position a secondary communication passageway (the sum of pathways 36)

Art Unit: 3751

lateral to the main pathway (24), the secondary passageway (the sum of pathways 36) in communication with the inlet (20) and the outlet (22) when the ball element (12) is in the angular position (figure 1), the secondary passageway (the sum of pathways 36) has a plurality of paths (36), wherein the secondary passageway has a cross section extending at an angle (figure 3) around the main pathway (24), wherein the angle is approximately 90 degrees (col. 7, lines 47-49), wherein the secondary passageway is symmetrical (figure 3), a toroidal element (14) seated on a seat (60), the toroidal element (14) is made up of a plurality of central bored discs (42 and 46), a curved plug (32), and a further passageways (56).

*Allowable Subject Matter*

6. Claims 8-10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 4,889,163 (Engelbertsson) discloses a ball valve having secondary passageways.

U.S. Pat. No. 3,529,628 (Cummins) discloses a valve element having a flow impedance unit.
